

The Spartan Helmet

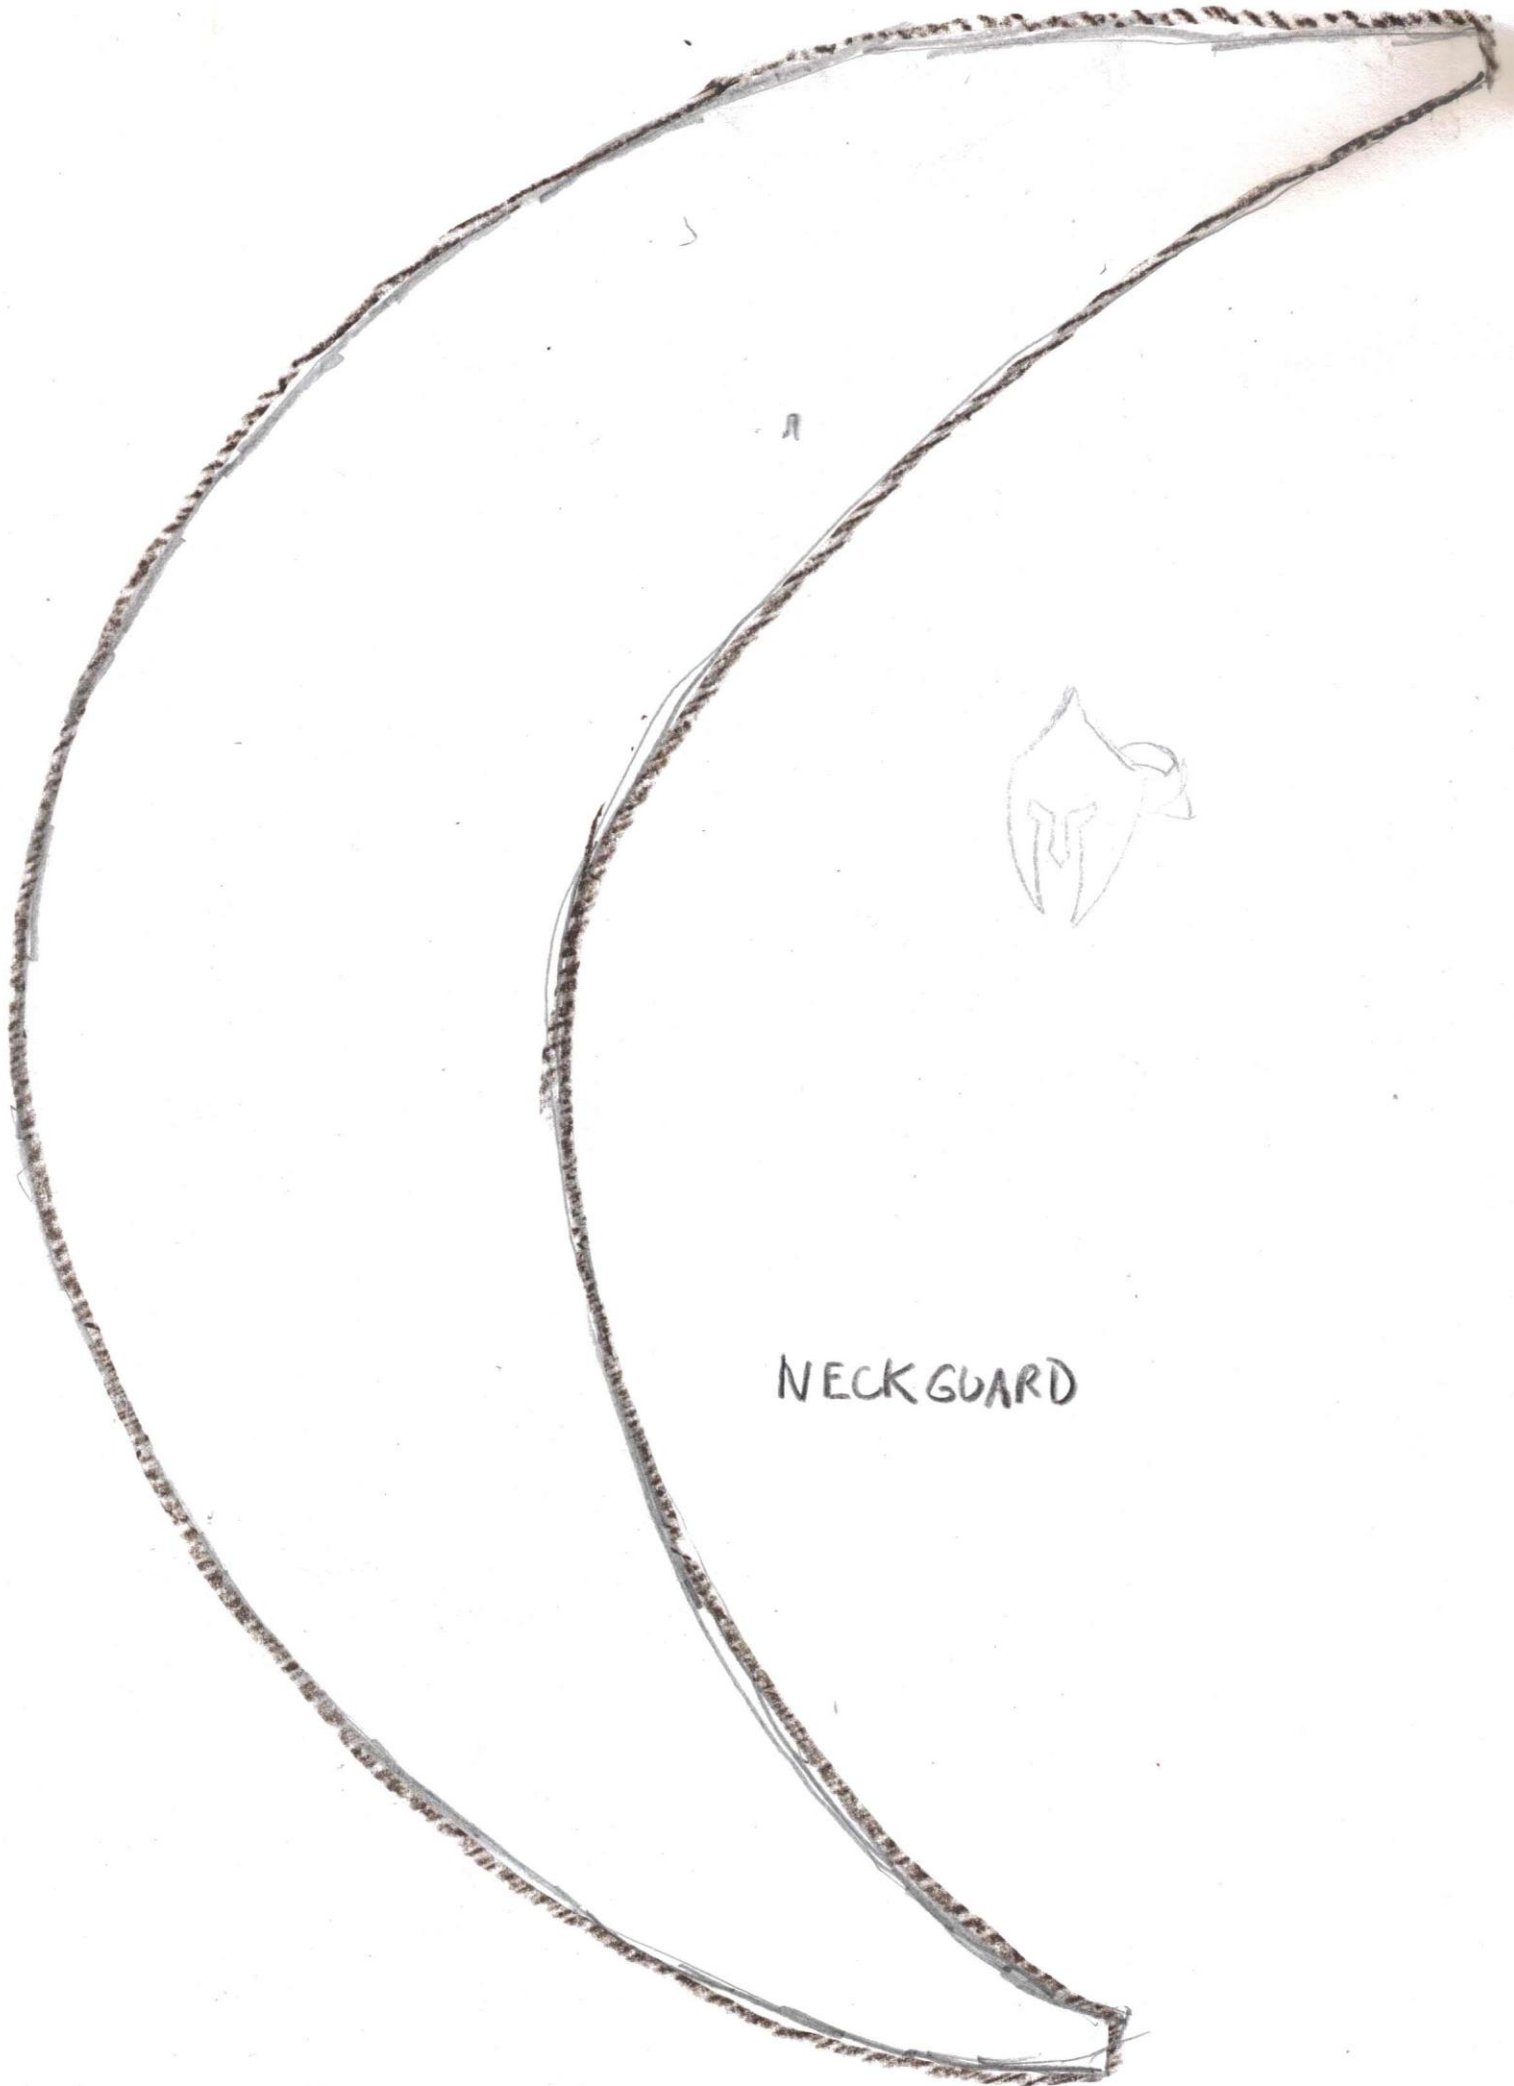

Here are the three templates that make up the Spartan helmet. You can print them out, use them to cut out the cardboard shapes then tape them together and make the helmet. Complete instructions on how to make this helmet are on my website here: <http://www.stormthecastle.com/how-to-make-a/spartan-helmet.htm>

About the printout. The templates are big, almost taking up a whole page. Your printer may warn you that it is going to print outside the margins. That's ok, go ahead and print it anyway. If on your printed sheets a little bit of the drawings are missing around the edges you can just draw them in yourself before cutting them out of cardboard.
